

Provenance information for *Eucalyptus* section *Adnataria*. Classification follows Brooker (2000) except where species were described after that publication. See Figure 5 for key to Classification Codes. CCA Code refers to specimen at Currency Creek Arboretum (South Australia), from where all samples were obtained. *Species not classified by Brooker (2000) but ascribed to a series on the basis of morphological affinities.

Species	Classification	CCA Code	Origin of seed
<i>E. absita</i> (Badgingarra box)	ABA	DN 1154	30° 26' 13" S, 115° 34' 32" E, near Badgingarra, WA
<i>E. aenea</i> *	ABC	DN 2083	32° 17' 34" S, 150° 24' 40" E, Goulburn River NP, nr Sandy Hollow, NSW
